S1227: COLORADO RIVER DROUGHT CONTINGENCY AMENDMENTS

Establishes the Arizona System Conservation Fund to be administered by the Director of the Department of Water Resources (Director), and appropriates \$30 million from the general fund in FY2019-20 to the Fund. The Director is

authorized to spend monies from the Fund to contract with Colorado River water users in Arizona that hold entitlements to Colorado River water under the decree in Arizona v. California to forgo water deliveries or diversions for the purpose of creating system conservation. System conservation created through the use of the Fund is required to provide for Colorado River water to be conserved in Lake Mead through a verified reduction in existing consumptive use in order to decrease the likelihood of lake elevations dropping to levels that could result in reductions to Arizona's Colorado River allocation. Beginning July 1, 2021 and each July 1 after, the Director is required to submit a report to the Governor and the Legislature on expenditures from the Fund during the previous fiscal year and the volume of water that was conserved in Lake Mead. The Fund self-repeals April 1, 2027. Prohibits a water banking fee from being levied in the Pinal Active Management Area (AMA) during calendar years 2020 through 2026. In the Pinal AMA during calendar years 2020 through 2026, the Director is required to set the annual groundwater withdrawal fee in an amount of up to \$2.50 per acre-foot per year for groundwater and irrigation efficiency projects. Monies from this fee are required to be used only to finance projects for the construction and rehabilitation of wells and related infrastructure for the withdrawal and efficient delivery of groundwater by irrigation districts in the Pinal AMA. Monies from this fee are deposited in the newly established Temporary Groundwater and Irrigation Efficiency Projects Fund (TGIEP Fund), and requirements for the TGIEP Fund are established. Appropriates \$7 million from the general fund in FY2018-19 to the TGIEP Fund. The TGIEP Fund self-repeals April 1, 2028. Establishes requirements for recovery of water that was effluent stored at a managed underground storage facility that qualifies as an "existing effluent managed underground storage facility" (defined) that has not been designated as a facility that could add value to a national park, national monument or state park. Long-term water storage credits may be used to demonstrate an assured water supply or an adequate water supply only if the managed underground storage facility qualifies as an existing effluent managed underground storage facility and the long-term storage credits were accrued before the effective date of this legislation. By December 31, 2019, the Arizona Water Banking Authority is authorized to enter into agreements to exchange long-term water storage credits accrued or purchased in one AMA with monies collected from specified groundwater withdrawal fees for long-term storage credits held by other persons in another AMA, on request of the Director, if the Director determines that the exchange is beneficial to water management in Arizona and that the exchange will not substantially impair the Authority's ability to meet its firming obligation to firm Indian settlement water. The term of any agreement entered into under this authorization is prohibited from extending beyond December 31, 2026. The Authority is permitted to distribute or extinguish long-term storage credits obtained by exchange. An exchange of long-term storage credits under this authorization is exempt from any fee established by the Dept for an assignment of long-term storage credits. A \$2 million appropriation in FY2018-19 is redirected from the Dept to the TGIEP Fund, and a \$2 million appropriation in FY2019-20 is redirected from the Dept to the Augmentation and Conservation Assistance Fund. Requires the Director to report to the Governor and the Legislature on agreements related to drought contingency plans. Contains a legislative intent section. Severability clause. Emergency clause.
