### **H2523: PROJECTS; WATER SUPPLY DEVELOPMENT**

For the purposes of funding from the Water Supply Development Revolving Fund, the definition of "water provider" is expanded to include a county that enters into an intergovernmental agreement with a municipality or other water provider regarding a water supply development project. Monies in the Fund may be used for a water provider located outside an active management area if the Department of Water Resources has designated the water provider as having an adequate water supply or if the water provider will use the financial assistance for a water supply development project and the Dept has determined that there is an adequate water supply for all subdivided land that will be served by the project. The maximum length of repayment for loans from the Fund is increased to 40 years, from 30 years. Statute prohibiting a facility owned by the state or a political subdivision from accepting for treatment, storage or disposal special waste generated outside Arizona is repealed. Establishes a 6-member Rural Water Supply Development and Contamination Prevention Study Committee to consider the effects of waste treatment, storage and disposal facilities on the development of long-term water supplies for rural areas that are under consideration for funding from the Fund. The Committee is required to report to the Governor and the Legislature by November

1, 2014, and self-repeals January 1, 2015. AS SIGNED BY GOVERNOR.
