For an application to modify or renew a designation of assured water supply in the Pinal Active Management Area, the Department of Water Resources is prohibited from reviewing the physical availability of groundwater that was determined to be physically available under the previous designation. The following are deemed physically available for purposes of an assured water supply designation: stored water that is to be recovered by the applicant within the "area of impact" (defined) on an annual basis or under long-term storage credits pledged to the designation, and physically available water that will be stored within the area of impact on an annual basis or as long-term storage credits in the future. For the purposes of statute governing an assignment of a certificate of assured water supply, and for a holder of a certificate of assured water supply for a platted subdivision, an increase in the total number of housing units does not constitute a material change in the subdivision plat, plan or map.
